

CreditBiz

Creditbiz provides the infrastructure to maintain your ledger from invoice issue to payment. Our focus is on ensuring you maintain long term relationships with your clients through establishing systems that will ensure payments from your clients are made on time, every month according to your terms of trade.

Because we recognise that debt collection is a byproduct of credit management practices, the Creditbiz suite of services aims to improve cashflow. By providing you with the skills to keep a tighter rein on credit management, Creditbiz can establish foundations for a strong ledger with reduced risks.

Alternatively the best solutions for your business may be to remove the burden of ledger management, allowing us to maintain your ledger from issuing the invoice to banking the payment.

Whichever options work best for you, we will develop a ledger management process that may include:

- Preparing credit reports and vetting new customers
- Personal in-house ledger management support including letters, telephone calls and other administrative tasks

- Helping resolve disputes and respond to invoice queries

- Collecting overdue accounts

- Reviewing your credit management documentation including your terms of trade
