

## Legal Services

Debtworks provides a full range of debt recovery litigation services.

In many cases, legal proceedings result in repayment of funds owed. While in some cases arbitration or mediation will obtain better results, legal action is sometimes the best way to recover a debt.

Our partnership with Citylaw combined with our in-house solicitors ensures the most effective and cost efficient options are adopted. Actions include:

- Having a debtor's assets and liabilities examined
- Obtaining an order to seize property and sell it at auction
- Having court ordered deductions from a debtor's wages or benefit
- Only under certain circumstances should legal action be taken.

However, before we are allowed to use the enforcement processes, we must prove to the Court that the money is owed. There are several ways to achieve this and we will provide a recommendation that best suits each debt's situation. Unlike some agencies that only use one or two standard approaches, our association with Citylaw ensures all the legal options available and what is the most effective and cost efficient.
